PRODUCT INSTRUCTION

REMOVE STRAP AND CHARGE MODE

- Note:**
1. When you use it for the first time, please fully charge it.
 2. The metal part of the plug needs to be aligned with the two metal plates on the fitness tracker.

DOWNLOAD APP

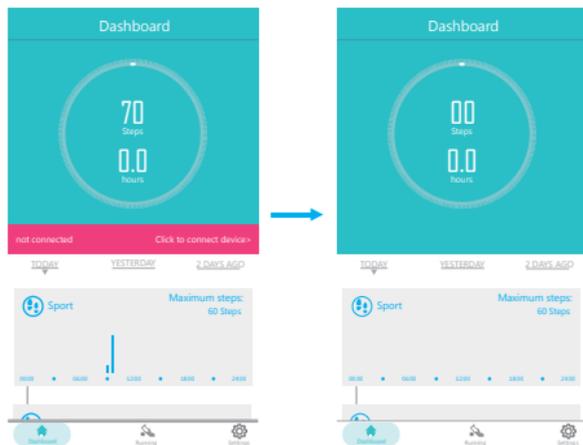

Download APP by scanning the below QR code or searching for "H Band" in APP Store / Google Play, etc., the APP will lead you to register an account. (The language of "H Band" APP will automatically switch depending on your smartphone's language.)

[H BAND] APP

CONNECTING DEVICE

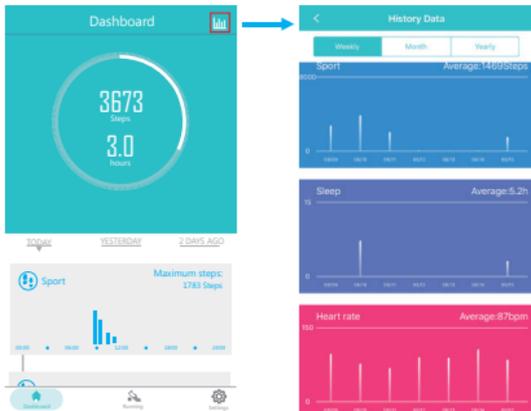

After full charge, turn on the fitness tracker by pressing the touch area for 3 seconds, activate the Bluetooth of your mobile phone. When you first open the "H Band" APP, the APP will lead you to bind the fitness tracker, or "Click to connect device" on the main interface of the APP.

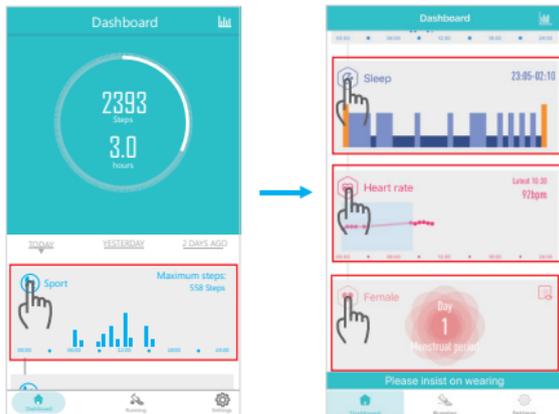

Note: If you cannot connect your device, please refer to "NORMAL PROBLEMS".

APP INTERFACE INTRODUCTION

1. Click on the top right icon to view your History Data.

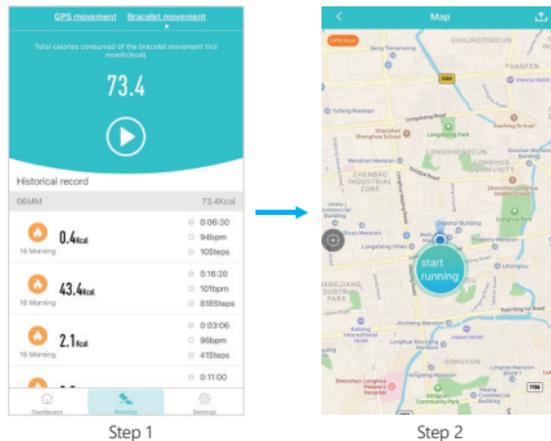

2. Click "Sport", "Sleep", "Heart rate" and "Female" (if you are female) respectively to see the detailed data of each section.

3

3. Click "Running" and enter into running mode.

Step 1

Step 2

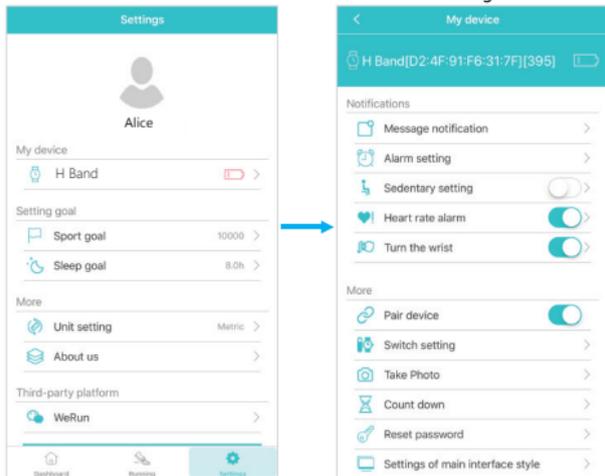

Step 3

Press the start key to start recording the track diagram. When you move around, it will automatically record your track. If you need to pause, please pull down the Pause key.

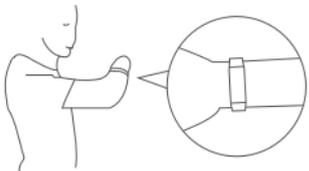

4

4. Click "Setting" and enter the settings interface, then Click "H Band" to enter the Function Settings Interface.

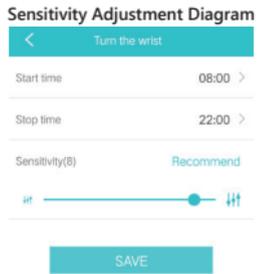

LIGHTEN UP THE FITNESS TRACKER

Press the touch area, or activate the "Turn the wrist" Function in the APP Function Settings, then turn over the wrist and the fitness tracker brightens automatically. (The sensitivity of "Turn the wrist" is adjustable: APP Setting > My device (H-Band)> Turn the wrist)

Note: If you adjust the sensitivity to the highest level, it will consume a lot of power.

FITNESS TRACKER FUNCTION INTRODUCTION

1. Introduction of equipment functional interfaces

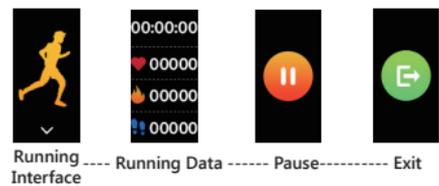

Press the touch area and you can change between multiple functional interfaces.

Tips: "Find Phone", the "Countdown" and the "Stopwatch" interfaces are closed by default. You need to restart those functions through APP Setting > My device (H-Band)> Switch settings / Countdown.

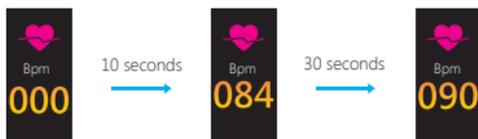

2. Running Mode

On the Running Interface, press the touch area for 3 seconds to enter the Running Mode. While in running mode, you can press the touch area to change between "Running Data", "Pause" and "Exit" Interfaces. "Running Data" Interface display running time, heart rate, running distance, calories, and steps in real time. While in the pause or exit Interfaces, press the touch area for 3 seconds to pause or exit Running Mode.

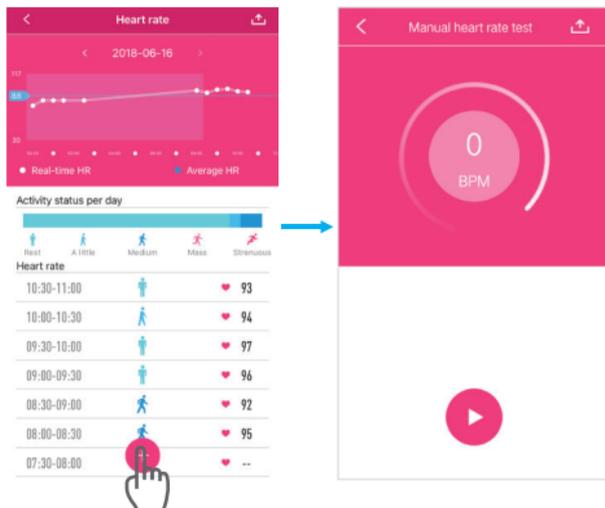

3. Heart Rate Mode

To measure your heart rate, you need to wait for approximately 10 seconds, then the data will appear. In order to ensure the accuracy of the Heart Rate test, you can wait for about 30 seconds.

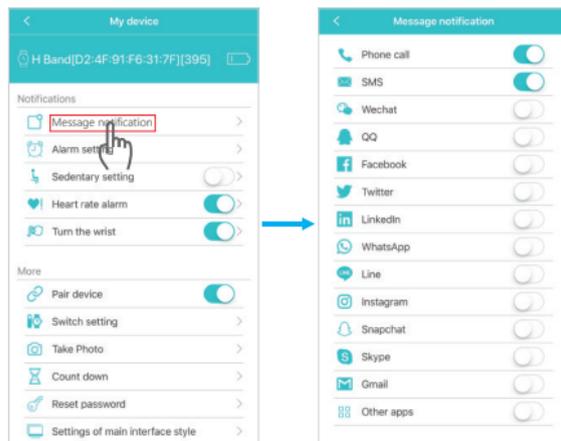

You can also test your Heart Rate through APP Heart Rate > Click "+"> Manual heart rate test.

4. Call and message reminder

Enter the Function Settings Interface, then click "Message notification", you can activate the Phone call / SMS / Facebook / Twitter / Line, etc. reminders.

When you have a Phone call or other information (SMS / Facebook / Twitter / Line, etc.), the fitness tracker will vibrate to remind you. When you receive the message, press the touch area to switch pages and view the complete information.

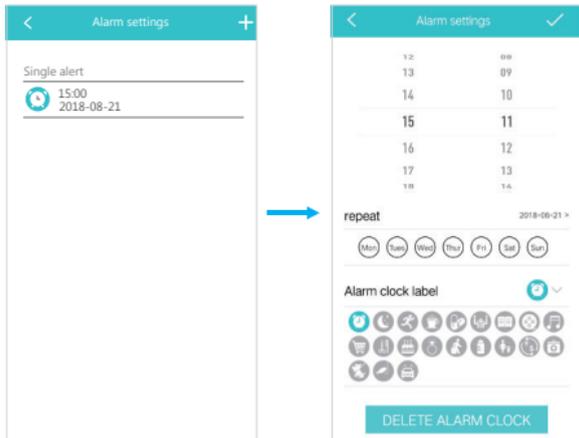

Call reminder

Message reminder

5. Alarm Clock and Events Reminder

Multiple events reminders can be set through APP Setting > My device (H-Band)> Alarm setting. This function can also add alarm clock label for important thing, such as "Sleep", "Go to work", "Coffee", "Meeting", etc.

Alarm Clock Reminder

When the set time arrives, the device will vibrate and display the alarm clock label.

6. Sedentary Reminder

Sedentary Reminder

This function can be turned on through APP Setting > My device (H-Band)> Sedentary setting. You can set a time value for the warning. When the device detects that the user has sat or kept still for the set time limit, the device will vibrate to remind you to move around.

7. Remote Photograph

Camera Mode

To use the device to take a remote photograph, you can turn on the Camera Mode through APP Setting > My device (H-Band) > Take Photo, then quickly shaking the fitness tracker.

8. Turn off the fitness tracker

Switch to Device Shutdown Interface and shutdown the device by pressing the touch area for 3 seconds.
