INFRARED REMOTE CONTROL

NOTE: When using the IR remote control, you should aim at the projector rather than screen.

POWER ON / OFF

1. Pull the power button to the left and hold it for about four seconds until the green indicator on the projector bottom is lit up, then the projector starts to work.
2. Turn the power button to the left again and hold it for about two seconds to shut down the projector.
3. Turn the power button to the right to lock the button, then the projector can be used as a power bank.

POWER BANK MODE AND CHARGING METHOD

1. When the projector is in power bank mode / projection mode, the projector can charge other devices via USB port.
2. In order to improve charging efficiency, please charge the projector with the **original power adapter** in **power bank mode**.
3. The number of indicators represent remaining capacity of battery.
 - a. When the 4 indicators are all on and without flashing, the capacity of battery is full.
 - b. When there is only one indicator on, the projector is in low power status and can be used as power bank for emergency.
 - c. If there is only one indicator flashing, it means all the power is used up and the projector needs to be charged.

EZWIRE: SCREEN-SHARING VIA WIRE CONNECTION

iOS Device:

1. Select and click EZWire icon in the main projector interface.
2. Connect the projector and iOS device with USB cable.
3. The iOS device will pop up a prompt, as shown in the figure below "Step 3".
Select "trust" and then wait a moment, the screen content on the iOS device will be displayed on the projector screen.

EZWire

(Step 1)

(Step 2)

(Step 3)
